## PROFESSIONAL SUMMARY

M.Sc. Computer Science graduate with hands-on experience developing machine learning and AI applications using Python, Scikit-learn, FastAPI, Flask, React, and large language models (LLMs). Skilled in data preprocessing, feature engineering, model evaluation, predictive modelling, and REST API development. Seeking a Junior AI Engineer role to contribute to practical AI and machine learning solutions.

## TECHNICAL SKILLS

- Programming language: Python, SQL, JavaScript
- AI & Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Regression, Classification, Feature Engineering, Model Evaluation
- Generative AI: Natural Language Processing (NLP), Large Language Model (LLM), Retrieval-Augmented Generation (RAG)
- Data Science and Analytics: Pandas, Numpy, Matplotlib, Seaborn, Microsoft Excel, Power BI
- Frameworks & APIs: Django, FastAPI, Flask
- Databases & Tools: MySQL, PostgreSQL, Git, GitHub.

## INTERNSHIP & EXPERIENCE

**AI & Full Stack Developer Intern | Hybrid Softech Solutions |Jan 2026 - Jun 2026**

- Developed the Patient Registration and Login module for a Hospital Management System using React.js and Django. Implemented user registration with input validation, duplicate account prevention, and secure password handling. Integrated JWT-based authentication to authorize patient access to appointments, billing details, and prescriptions. Designed a responsive user interface and implemented error handling to improve usability, data integrity, and access security.

**Full Stack Developer Intern | Inspire Softech Solutions |Apr 2025 - May 2025**

- Developed a Learning Management System (LMS) using Django, Python, HTML, CSS, JavaScript, Bootstrap, and MySQL. Built responsive user interfaces, integrated backend functionality with database operations, and implemented core features to support learning content management and user interactions. Contributed to full-stack application development, database integration, and responsive web design.

## PROJECTS

**MoniVerse AI**

- Developed an AI-powered conversational application using React and Flask, integrating a locally hosted Mistral large language model through Ollama. Implemented conversational interactions and PDF and image understanding to enable users to process content and obtain responses to their queries.

**Credit Card Fraud Detection**

- Developed an end-to-end machine learning system for credit card fraud detection using Python and Scikit-learn. Performed data preprocessing, feature scaling, Random Forest classification, and model evaluation, then integrated the trained model with FastAPI to provide fraud predictions through REST APIs.

**House Price Prediction Web Application**

- Built a machine learning web application to predict house prices using Python and Scikit-learn. Performed exploratory data analysis, data preprocessing, and feature engineering, trained a Random Forest regression model, and integrated it with Flask to deliver house price predictions.

## EDUCATION

**M.Sc. Computer Science** 2024-2026
University of Madras, Chennai Percentage:75%

**B.Sc. Computer Science** 2021-2024
Pachaiyappa's College for Men, Kanchipuram Percentage:78%

## CERTIFICATIONS & ACHIEVEMENTS

- Data Analytics with AI — Sololearn
- SQL Certification — Scalar, Simplilearn
- Best Student of the Year (2022) & Rank 1 in Academics (2023)
- English Typewriting (Junior & Senior) & School-Level Badminton Winner (2018)
